## Personal statement

---

A highly focused software developer with 8 years of commercial experience in software development with a big interest in the .NET platform. Organized, methodical and a keen eye for detail results in solid coding and producing the expected outcome on time. Understanding client requirements and communicating the progress of projects are core values in achieving long lasting business relationships. A great problem solver that thrives under pressure and eager to learn, easy going by nature and able to get along with both work colleagues and senior managers. In recent years, I've expanded my skills into AI development and API integration, working with conversational AI, chat completions, and automation workflows.

## Technical Skills

---

### Programming Languages & Frameworks:

- C#, VB.NET, LINQ, VBA (8 years - currently using)
- HTML, CSS, JavaScript, jQuery (8 years - currently using)
- Python (2 years - currently using)
- Java, Android (1 year - past)
- WordPress & PHP (1 year - past)
- MVC(4 years - currently using)

### Databases, Cloud, Version Control & Tools

- MySQL, SQL Server (8 years - currently )
- Azure (5 years - currently using)
- AWS (1 -year)
- Git(2 years)
- Bitbucket (5 years)
- Jira (5 years)
- Azure (5 years - currently using)
- AWS (1 -year)

### AI & Automation

- Developed and integrated AI-driven solutions (chatbots, chat completion APIs, workflows)
- Implemented OpenAI GPT-based models & Azure Cognitive Services
- Designed custom Javascript based chat widgets with AI-powered conversation flows

## Employment History

---

### Web Developer, ArdentTide, Harrow London.

*(April 2017 – Present)*

#### Role and Responsibilities.

- Architected and delivered complex, full-stack web applications, owning the entire lifecycle from requirements gathering and system design to deployment and post-launch support.
- Launched multiple new projects end-to-end, including database schema design, data migration, API development, and cloud deployment, ensuring scalable and secure architectures.

- Optimized and refactored legacy systems, improving performance, resilience, and security through code reviews, automated testing, and modern best practices.
- Enhanced user experience by expanding company websites with new features, responsive UI, and performance tuning that reduced page load times and increased customer engagement.
- Designed and implemented data reporting platforms using MySQL, enabling real-time insights and automated dashboards for internal and client stakeholders.
- Developed and integrated RESTful APIs connecting internal systems to third-party services (SendGrid, RingCentral, Microsoft 365), streamlining communication and operations.
- Introduced Python and Azure cloud solutions to automate workflows, modernize infrastructure, and accelerate time-to-market for new products.
- Delivered AI-driven features, including conversational chatbots, chat completion APIs, and automation workflows using OpenAI GPT and Azure Cognitive Services to improve internal processes and customer support.
- Thrived in a fully remote environment for over 5 years, demonstrating exceptional self-management, cross-team communication, and delivery of high-impact initiatives independently.

### **Junior Developer, Unidast.gr, Kalamata, Greece.**

*(January 2015– May 2016)*

#### **Role and responsibilities:**

- Analysing and debugging code.
- Maintaining the stability of all live systems.
- Design and develop multi-threaded windows applications.
- Outlining and presenting specifications for all software requirements.
- Writing multiple code and script and ensuring cross browser compliance.
- Responsible of android mobile applications design and development.
- Developed responsive applications to fit different screen sizes.
- Enhanced my JAVA 7 SE skills by developing custom native android apps.
- Gained experience with VB.NET and WinForms by assisting on request.
- Gained experience with SVN repositories.
- Enhanced my MySQL design and development skills by creating the desired databases.
- Gained experience with html CSS and PHP by using WordPress CMS and PrestaShop.

## **Education**

---

**University of Kingston**

**2011 – 2014**

**BSc (Hons) in Computer Science**

## **References**
